

Envelopes with Custom Shape Windows

Envelopes can be produced with any shaped window. All we need is a PDF of the outline. These can be on the front, back or both.

A great way to have your Direct Mail piece stand out and grab attention. No extra cost compared with a standard window of a similar size. Very easy to implement.

Windows can be placed anywhere on the front, rear or both. These can be any shape or size and incorporated in any envelope size. Envelope paper must be at least 100gsm.
