

voucher offerlope

An envelope with a removable panel that can be used as a redemption voucher.

An inexpensive way to leverage your mail costs.

Very simple to implement. Just send us the PDF of the voucher and we can incorporate into the next production run of your envelopes.

A cheap and novel way to provide a redemption voucher to customers.

The removable panel consists of a laminated layer inside the envelope with a perforation in the envelope material the shape of the panel.

The laminated layer can be of any material (eg. Gloss Coated) up to 130gsm. If the envelope itself is made from 80gsm, the total voucher weight would be 210gsm. The voucher can be printed in process colour.

Removable adhesive tape can be applied to the voucher inside the envelope. Removing the tape allows the voucher to be attached to a refrigerator etc.

The voucher can be any size and incorporated into any envelope.
